

Small Screws for Fixing Hardware to Picture Frames

PUB124

Possibly the most comprehensive range of small screws for wood in the UK

Screws: Countersunk, Pozi, Silver ZP

723A	3 x 9.5mm	200
723T	3 x 9.5mm	1000
724A	3 x 13mm	200
724T	3 x 13mm	1000
720A	3.5 x 13mm	200
720T	3.5 x 13mm	1000
6689A	3.5 x 16mm	200
6689T	3.5 x 16mm	1000

Screws: Countersunk, Slotted, Silver ZP

721A	3 x 9.5mm	200
721T	3 x 9.5mm	1000
722A	3 x 13mm	200
722T	3 x 13mm	1000

Screws: Countersunk, Slotted, Solid Brass

709C	2.2 x 6mm	200
709E	2.2 x 9.5mm	200
709G	2.2 x 13mm	200
709F	3 x 9mm	200
709H	3 x 13mm	200
709J	3 x 16mm	200

Screws: Countersunk, Pozi, Black

NEW

10834	3 x 9.5mm	200
10835	3.5 x 13mm	200

Screws: Countersunk, Pozi, Solid Brass

5231A	3 x 9.5mm	200
5231T	3 x 9.5mm	1000
5232A	3 x 13mm	200
5232T	3 x 13mm	1000
5233A	3.5 x 9.5mm	200
5233T	3.5 x 9.5mm	1000
5234A	3.5 x 13mm	200
5234T	3.5 x 13mm	1000
3969A	4.2 x 13mm	200
3969T	4.2 x 13mm	1000

Screws: Flange head, Pozi, Silver ZP

7416A	3 x 9.5mm	200
7416T	3 x 9.5mm	1000
7418A	3 x 13mm	200
7418T	3 x 13mm	1000
7417A	3.5 x 9.5mm	200
7417T	3.5 x 9.5mm	1000
7419A	3.5 x 13mm	200
7419T	3.5 x 13mm	1000
9933A	3 x 16mm	200
9933T	3 x 16mm	1000

Screws: Pan head, Pozi, Bronze Finish

711P	3 x 9.5mm	200
711R	3 x 9.5mm	200
711Q	3.5 x 9.5mm	200
711S	3.5 x 13mm	200

Screws: Pan head, Slotted, Silver ZP

725A	3 x 9.5mm	200
725T	3 x 9.5mm	1000
726A	3 x 13mm	200
726T	3 x 13mm	1000
728A	3.5 x 9.5mm	200
728T	3.5 x 9.5mm	1000
729A	3.5 x 13mm	200
729T	3.5 x 13mm	1000

Screws: Pan head, Pozi, Silver ZP

730A	3 x 9.5mm	200
730T	3 x 9.5mm	1000
731A	3 x 13mm	200
731T	3 x 13mm	1000
732A	3.5 x 9.5mm	200
732T	3.5 x 9.5mm	1000
733A	3.5 x 13mm	200
733T	3.5 x 13mm	1000
718A	3.5 x 16mm	200
718T	3.5 x 16mm	1000
5058A	3.5 x 19mm	200
5058T	3.5 x 19mm	1000

Screws: Pan Head, Plus-Driv, Brass Finish

Sharper and deeper grooves to speed insertion. The special Plus-Driv screw heads reduce cam-out during installation.

9155A	3 x 13mm	200
9155T	3 x 13mm	1000
9156A	3.5 x 13mm	200
9156T	3.5 x 13mm	1000
9157A	3.5 x 19mm	200
9157T	3.5 x 19mm	1000

Screws: Pan Head, Pozi, Black

NEW

10832	3.5 x 9.5mm	200
10833	3.5 x 13mm	200

Screws: Round head, Slotted, Solid Brass

710F	2.2 x 13mm	200
710G	3 x 13mm	200

See Torx head screws and driver bits

9570 King Dick '1 for 6' Screwdriver for Pozi and Philips head screws

Finding the right screwdriver to exactly match the head of each cross head screw can waste time. The unique and patented tip design on the '1 for 6' screwdriver from King Dick allows powerful contact with all three commonly found sizes of Pozidriv and Philips.

It works well with all Pozi, PZ, 1, 2 and 3 and Philips, PH, 1, 2 and 3 cross-head screws. The blade is made from high grade steel, hardened and plated. It has a 8mm hex shaft, 205mm long and soft-feel handle for comfortable use.

Torx screws can save you time!

Choices of small screws to fix frame hardware in a frame makers workshop have long been limited to either Pozi or slotted heads.

We all know how easily it is for a flat-blade screwdriver to slide out of the screw slot. Much better are the Pozi heads when used with the correct screwdriver. If not, they can too easily 'cam-out'.

A much better format of screw head is called Torx and has been in use in many industries for several years. It has been proven better in two ways:

- The precision **Torx** driver bits rarely jump out of a **Torx** screw head, useful when using electric screwdrivers.
- When smaller **Torx** screws are pushed onto the **Torx** driver bit, they will often stay in place while the screwdriver positions the screw. Helps to have a magnetic tip. Handy when working with very small screws.

At a glance, **Torx** heads look a bit like an Allen socket. On a close look, the **Torx** head indent shows six convex faces in a star pattern. Unlike a Pozi driver head **Torx** driver bits have six tapered and curved flutes. These engage firmly with the **Torx** screw heads.

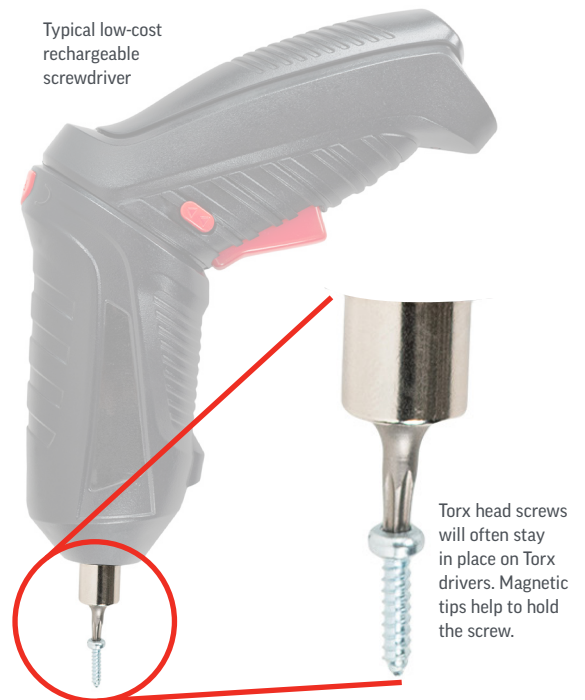

Torx screws usually come in bags of 500 with a matching driver bit

Lion have added **Torx** small wood screws to their range and most packs of 500 come with a matching **Torx** driver bit, with its number on the label. Small rechargeable screwdrivers are readily available - as are **Torx** driver bits - see Ebay.

Use your rechargeable screwdriver also as a wood drill for pilot holes

When fixing hardware to frames, sometimes it is preferable to drill a pilot hole before driving the screw. A rechargeable screwdriver can be turned into a small drill using a Mini-chuck with normal drill bits, or using hex shoulder drill bits, which fit straight in.

Typical low-cost rechargeable screwdriver

Torx head screws will often stay in place on Torx drivers. Magnetic tips help to hold the screw.

The detailed design of the Torx indent in the top of every Torx head screw. Screw sizes vary and have matching Torx driver.

Torx Head Screws: Pan Head, Silver ZP

10838	2.9 x 9.5mm	T10 Driver bit inc	500
10839	2.9 x 13mm	T10 Driver bit inc	500
10840	3.5 x 9.5mm	T15 Driver bit inc	500
10841	3.5 x 13mm	T15 Driver bit inc	500

NEW

A Torx head screw, in place on a Torx driver bit.

Torx Head Screws: Countersunk, Silver ZP

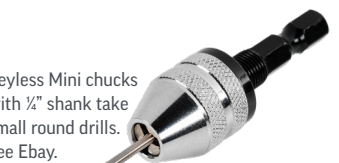

10842	2.9 x 9.5mm	T8 Driver bit inc	500
10843	2.9 x 13mm	T8 Driver bit inc	500
10844	3.5 x 9.5mm	T15 Driver bit inc	500
10845	3.5 x 13mm	T15 Driver bit inc	500

NEW

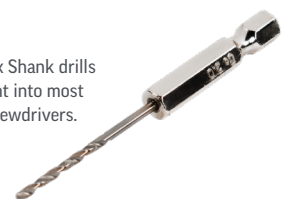

Longer Torx drivers are available in sets. Can be more convenient to use.

Keyless Mini chucks with 1/4" shank take small round drills. See Ebay.

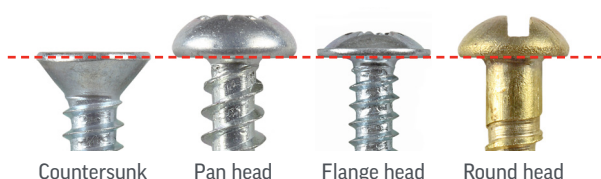

HSS 1/4" Hex Shank drills pop straight into most electric screwdrivers. See Ebay.

All packs have a matching **Torx** head, 25mm, included

You should carefully select the correct flat blade or Pozi screwdriver.

None of our screws are Philips head. If you use the wrong tip, the head of the screw may be damaged.
