

CWH Square Sawtooth Picture Hangers

A smarter and quicker way to hang pictures and mirrors with no wire to tie or to break

PUB036

CWH1 Picture Hangers – for canvases on wooden stretcher bars and for wood and polymer hollow back picture frames.

Little guides speed alignment of CWH1 hangers onto the frame. The 8mm slots and micro sawtooth detail make levelling the frame easier.

Made from 1.0mm steel with 3.8mm screw holes. Silver zinc plated. Use singly with one in centre of top rail. Or use in pairs, with one fitted on each side. Size 50mm/2" x 46mm/1.8"

CWH2 Picture Hangers – for wood and polymer picture frames with flat or papered backs.

The shape of a CWH2 hanger spaces the frame slightly away from the wall to sit on most nails and hooks. This hanger can be turned over which can suit some frames.

Made from 1.0mm steel with 4mm screw holes and slots. Silver zinc plated. Use singly with one in centre of top rail. Or use in pairs, with one fitted on each side. The 8mm slots and micro sawtooth detail make levelling the frame easier. Size 50mm/2" x 49mm/2.0"

6926D	CWH2 Picture Hangers	2000pcs

CWH5 Picture Hangers – an easier hanging and levelling option for most wood and polymer picture frames. Always used in pairs.

The unique feature of CWH Picture Hangers is that the micro-sawtooth bar which sits on the hook or nail is angled at 19°. CWH5 hangers are always fitted in pairs and are flat so are flipped over as needed when fitting. Size 50mm/2" x 46mm/1.8". Screw holes are 4mm.

To hang a frame with CWH5 hangers, first measure between the dots on the plates, then make matching marks on the wall. Using Post-its can help here.

Use suitable hooks, nails or screws and sit the frame on them. Small lift and sideways movements will level the picture frame. The 8mm slots can also help.

9201B	CWH5 Picture Hangers	200pcs	for 100 frames

CWH3 Picture Hangers – for most aluminium side-loader picture frames

Fits most makes of side-loader aluminium picture frame profiles. Lion M Series, Larson-Juhl, Nielsen and more.

CWH3 hangers are fitted after the frame is assembled. Place it in the channel and lock with a suitable screwdriver – do not overtighten. Made from 1.4mm steel, zinc plated. Size 52mm/2.1" x 49mm/2.0"

Use singly, with one in the centre of the top rail of the frame. Or use in pairs, one each side – this way makes levelling very easy.

CWH1 & CWH2 Square Hangers are for wood and polymer picture frames

CWH1 Hangers have little guides to speed alignment when fixing them to frames

Each CWH hanger has stamped 'X' or dot marks to help accurate measuring when planning where to position hooks on the wall.

CWH Hangers 1, 2 and 3 can all be used singly, placed in the middle of the top rail of the frame. This way frames are easy to level and works well for smaller frames.

CWH hangers 1, 2 and 3 offer a little bit of sideways adjustment on the micro-sawtooth. 1 and 2 have 8mm slots for vertical adjustment and 3 can easily be adjusted in the frame profile slot.

CWH Hangers work better on larger frames when fitted in pairs. The 8mm slots allow adjustment for level. The micro-sawtooth allows small sideways adjustments.

CWH Square Picture Hangers are quick to fix with screws and a power screwdriver. Once a frame is hung on the wall, using two hooks, screws or nails, there is no wire to sag or break. CWH hangers also make it much easier to hang groups of frames

CWH Square Picture Frame Hangers - Trial Pack

CWH Trial Pack contains lots of samples of the four different styles: CWH1 X 20pcs, CWH2 x 20pcs, CWH5 x 20pcs and CWH3 x 10pcs. Depending whether used singly or in pairs, the Trial Pack plates will hang between 35 and 50 frames. All styles hang on most screws, pins and picture hooks.

CWH Square Picture Frame Hangers - Taster Pack

CWH Taster Pack contains two plates of each of CWH1, CWH2 and CWH5 hangers for wood frames and CWH3 hangers for aluminium. This is an easy way to try the CWH hanger range. Plates in the Taster Pack will hang between 4 and 7 frames, depending how they are used.

10707 CWH Square Picture Frame Hangers -Taster Pack

CWH3 Square Hangers for most side-loader aluminium frames

Aluminium picture frames are always popular for contemporary art and display graphics. CWH3 square hangers can be used singly and in pairs. Either way, they are quick to fit and to adjust, making speeding hanging.

CWH5 Square Hangers are designed to work in pairs on wood and poly frames

Their unique design means that when the frame is placed onto two hooks or screws, it can be levelled with a slight lift and sideways movement.
